

Change Management Policy

Version v2 · Effective 1 November 2026 · Status: draft

Owner: Head of Platform · Category: Information security

Applies to: Technology

Fictional policy written for a software demonstration. Kestrel Mutual is an invented organization. This is not real policy, law or regulatory guidance.

1 Purpose

This policy sets how changes are made to Kestrel Mutual production systems.

2 Normal changes

2.1 Change record

Every change to a production system needs an approved change record before it is made.

2.2 Approval

Normal changes are approved by the Change Advisory Board at its weekly meeting.

2.3 Change window

Normal changes are made only between 19:00 and 07:00 on weekdays, or at weekends.

2.4 Rollback plan

Each change record must include a tested rollback plan.

2.5 Peer review

Code changes must be reviewed by an engineer other than the author before release.

3 Emergency changes

3.1 Emergency change exception

An emergency change needed to restore a service may be made without Change Advisory Board approval, instead of following clause 2.2, if the on-call engineering manager approves it. The Change Advisory Board reviews it within two working days.

4 Change freeze

4.1 Year-end freeze

No normal changes are made to customer-facing systems between 15 December and 5 January.
